HNCO

Influence of a function parameter on the performance of search algorithms

August 7, 2020

Abstract

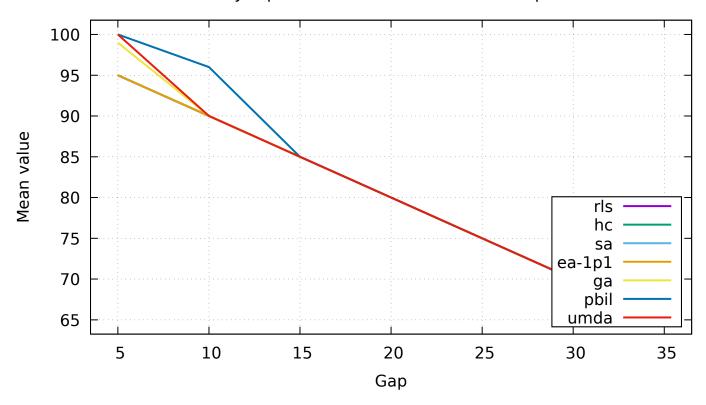

Search algorithms are applied to the functions Four Peaks and Jump. Their performance is studied as a function of the gap, a function parameter which controls the hardness of Four Peaks and Jump.

Contents

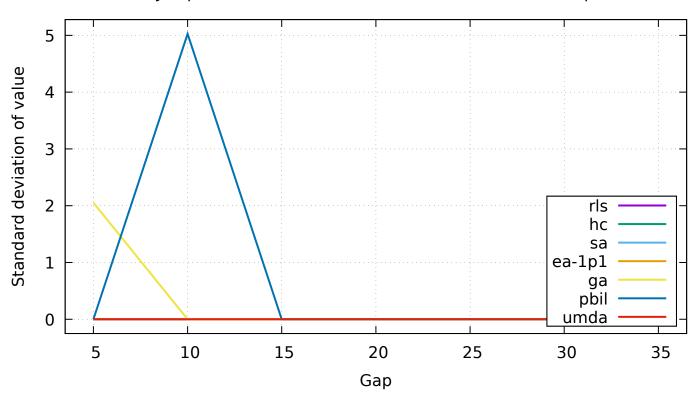

1	Function Jump	1
2	Function Four Peaks	5
A	Plan	8
В	Default parameters	g

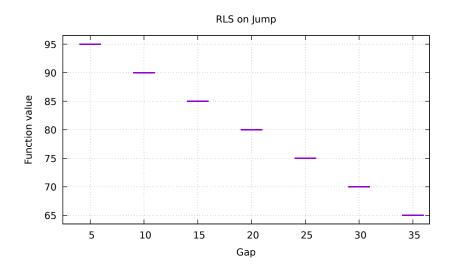

1 Function Jump

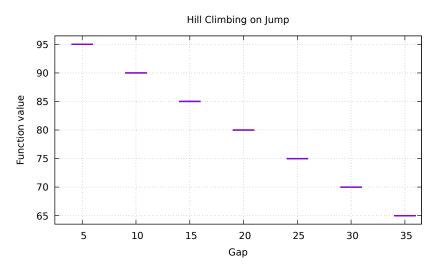

Jump: Mean value as a function of Gap

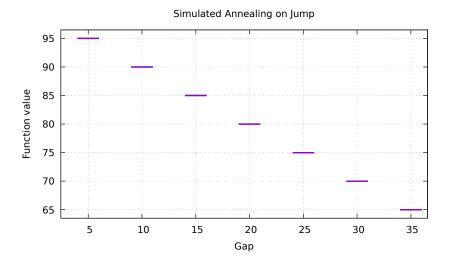

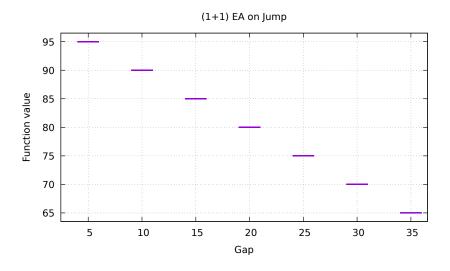

Jump: Standard deviation of value as a function of Gap

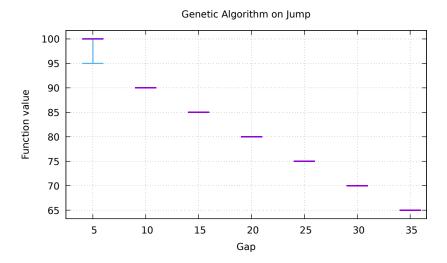

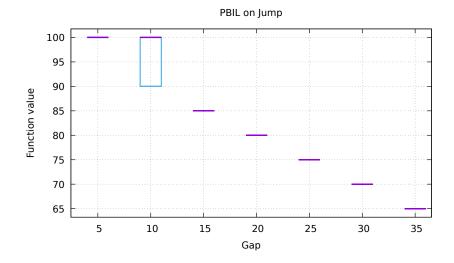

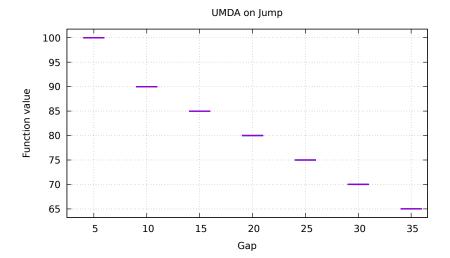

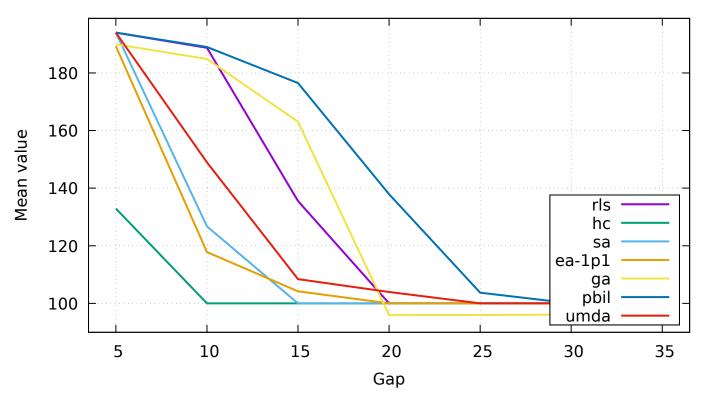

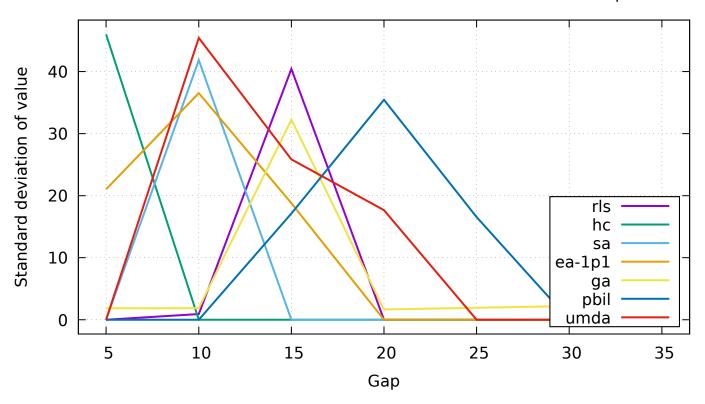

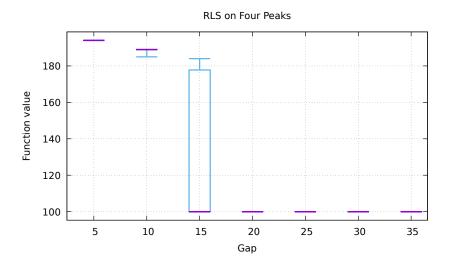

2 Function Four Peaks

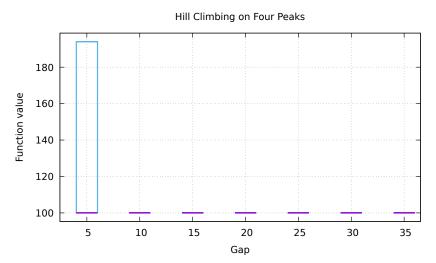

Four Peaks: Mean value as a function of Gap

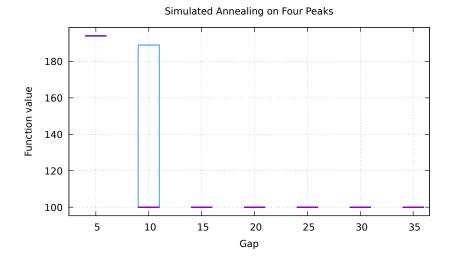

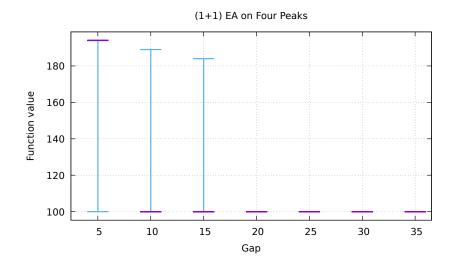

Four Peaks: Standard deviation of value as a function of Gap

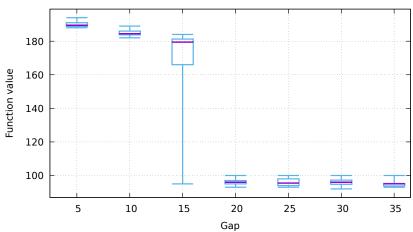

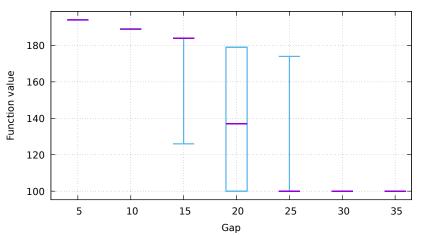

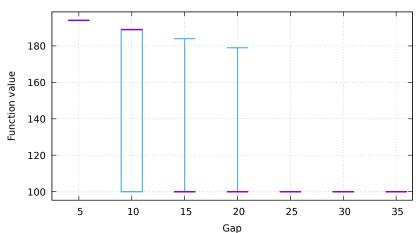

Genetic Algorithm on Four Peaks

PBIL on Four Peaks
